

## **EMPANELLED OF INFORMATION SECURITY AUDITING ORGANISATIONS**

### **IT Security Audit (Full Scope of Audit)**

Within the broad scope, 'Information System Security Audit' or 'IT Security Audit' covers an assessment of security of an organisation's networked infrastructure comprising of computer systems, networks, operating system software, application software, etc. A security audit is a specified process designed to assess the security risks facing an organisation and the controls or countermeasures adopted by the organisation to mitigate those risks. It is a typical process by a human having technical and business knowledge of the company's information technology assets and business processes. As a part of any audit, the auditors will interview key personnel, conduct vulnerability assessments & penetration testing, catalog existing security policies and controls, and examine IT assets. The auditors rely heavily on technology, manual efforts & tools to perform the audit.

### **For Customer Organisations**

The list of IT security auditing organisations, as given below, is up-to-date valid list of CERT-In empanelled Information security auditing organisations. This list is updated by us as soon as there is any change in it. Customer organisations may refer this list for availing their services on limited quotes / tender basis to carry out Information security audit of their networked infrastructure. While placing the order, customer organisations should again refer this list for the latest changes, if any, and should place order only on the organisation, which is in this list on that particular day.
